OBJECTIVE

A final-year B.Tech (CSE) student with strong hands-on experience in HTML, CSS, JavaScript, React, and Redux. I possess a solid understanding of data structures and algorithms in C++ and a deep enthusiasm for developing responsive, user-centric web applications. I am dedicated to writing clean, efficient code and focused on building scalable, high-performance frontend solutions.

SKILLS

Frontend: React, JavaScript, HTML, CSS, Redux, Tailwind

Programming Languages: C++

Data Structures: DSA

PROJECTS

My Portfolio wwwPortfolio.com

- This portfolio website is built using **HTML** for structure, **JavaScript** for interactivity, **React** for creating reusable and dynamic UI components, and **Tailwind CSS** for modern, responsive, and efficient styling.

Swiggy Clone wwwSwiggyClone.com

- Developed a responsive clone of Swiggy using React.js and Redux for state management.
 - Implemented key features including dynamic restaurant listings with search and filter functions, a shopping cart, and user authentication.
 - Fetches and displayed real-time restaurant and menu data from a live API.
- Technologies Used: HTML, Tailwind CSS, JavaScript, React, Redux

LeetMetric wwwleetmetric.com

- Engineered a React.js web application that fetches and visualizes a user's LeetCode profile statistics and progress using the LeetCode API.
 - Implemented data visualization charts to display problem-solving distribution and submission history.
- Technologies Used: HTML, CSS, JavaScript, React, Tailwind
-

EDUCATION

Bachelor of Technology in Computer Science & Engineering
Dr. A. P. J. Abdul Kalam Technical University, Lucknow | CGPA: 7.0

Sept 2022 - Aug 2026

Class 12th (Senior Secondary Education)
+2 SBF inter college, Harewali, Bijnor | Percentage: 70%

2022
